

BUSINESS MODEL

Model-Based Licensing System

Membership is used for account creation, publication management, model management, and billing history. Revenue is generated through model licenses rather than account-level subscription tiers.

LICENSE INVENTORY

License Packages

FREE / PRO / LIFETIME

Free Access

PREVIEW

\$0

3-day active access

Suggested model size limit: **25-50 MB**

- Viewer access for 3 days
- AR usage during the active preview window
- Screenshot capture
- QR and viewer link are generated immediately
- After 3 days, viewer access closes
- Model, QR, and link remain stored in the system
- Upgrade reactivates the same viewer link and QR code

Pro License

3 YEARS

\$10

per model, one-time activation

Model size limit: **100 MB**

- 3-year active access
- Viewer, AR, screenshots, QR, and public/private link
- Free models can be upgraded without changing the URL
- Viewer link and QR code remain the same
- If assigned before upload, Pro upload limits apply from the start
- Model license and viewer features can change in the background

Lifetime License

PREMIUM

\$39

per model, lifetime access

Model size limit: **250 MB**

- Lifetime viewer, AR, screenshot, QR, and link access
- Automatic model preview video generation
- Viewer annotations and visible pins
- Saved custom camera angles
- Guided viewing sequence for visitors
- Custom info boxes and model notes
- Richer model metadata fields
- Larger files and a more advanced viewer experience

Purchase and License Wallet

HYBRID FLOW

01

Create

The user creates an account, then creates a publication, article, poster, thesis, or project title.

02

Upload

The publication page directly presents model upload, followed by Free Access, Pro License, and Lifetime License choices.

03

Buy

The user can buy 2 Pro licenses and 3 Lifetime licenses in a single payment, creating license credits.

04

Assign

Unused licenses appear in the License Wallet and can be assigned to any eligible model later.

Positioning

The account is free. The model is the monetized asset. The QR code and viewer URL stay stable while the license behind the model changes.

Upgrade Behavior

STABLE LINK AND QR

When a License Is Assigned

- The model viewer link does not change.
- The QR code does not change.
- The model license level and viewer features change.
- The access duration and license rights are written to the model record.
- Free-to-Pro and Free-to-Lifetime upgrades reactivate the same public model destination.

File Size Edge Case

- If a model was originally uploaded under Free Access, it may have used the lower Free file size limit.
- If the user later upgrades to Lifetime, Lifetime features unlock immediately.
- The user may optionally re-upload a higher quality file to benefit from the 250 MB Lifetime limit.
- If a Pro or Lifetime license is assigned before upload, that license limit applies from the start.

Admin Panel

OPERATIONAL CONTROL

Management Areas

- Users
- Publications and titles
- Models
- Licenses
- Unused license credits
- Model-license assignments
- Payments and invoices
- Expired and soon-to-expire models

Manual Admin Actions

- Add 1 Pro License to a user account
- Add 5 Lifetime Licenses to a user account
- Define a custom institutional limit
- Extend a model license
- Cancel or adjust a license
- Support B2B and high-volume accounts manually

Institutional Licensing

B2B OFFER-BASED SALES

- Institutional licensing does not need to be sold as a self-service web checkout in the first version.
- It can be positioned as "Contact for institutional licensing".
- Institutional packages may include higher model limits, bulk license credits, multi-user lab accounts, special invoices, multi-model viewers, custom embed solutions, and manual technical support or model optimization services.
- Large model limits can be handled selectively for B2B customers rather than exposed broadly on the public pricing page.

Technical Assumptions

DATA MODEL DIRECTION

Model-Level License State

- User plan stops being the main business model.
- Each model stores its license state: free, pro, or lifetime.
- Each model stores license status, license start, license expiration, and maximum file size.
- Viewer access control reads the model license instead of the publication package.

License Inventory and Payments

- Unused purchases are stored as license inventory.
- License credits support unused, assigned, refunded, and expired statuses.
- A license credit can later be assigned to a model.
- Payments support line items so one checkout can include multiple Pro and Lifetime licenses.

Acceptance Criteria

LAUNCH CHECKS

- A user can create a free account and create a publication.
- The publication model upload screen shows Free Access, Pro License, and Lifetime License options.
- A user can upload a free model and use it for 3 days.
- When Free Access expires, the QR and viewer link remain the same but access falls back to an upgrade screen.
- A user can buy 2 Pro licenses and 3 Lifetime licenses in one payment and see them in the account.
- A user can assign an unused license to any eligible model.
- Pro and Lifetime upgrades preserve the viewer link and QR code.
- Lifetime models unlock annotation, saved camera angles, info boxes, guided views, and preview video features.

Implementation note: The first implementation should keep the upload and purchase flow simple: allow Free Access upload immediately, allow pre-purchased Pro/Lifetime license assignment before upload for higher file limits, and preserve the same model URL/QR across every upgrade path.
